Prototype-Test Feedback

Prototype Short Description:

Test Situation (incl. date & location/situation):

Involved Parties/Stakeholders:

What was the effect of the prototype, how did it turn out? How does this contrast with the expectations?

How did the system (e.g. other stakeholders, people/ organisations) respond/react? Did they give direct or indirect feedback?

Your overall estimate of the prototype (place a cross on the continuum):

Complete success	Partial success	Rethink fundamentally	Complete failure
Repeat/upscale identically	Make some improvements	Come up with new prototype	Abandon altogether

The most important insights/lessons:

The best, to absolutely hold onto:

The most significant changes/variations/improvements:

Ideas for (completely) new/altered prototypes:

Ideas for (completely) new/altered test situations:
